## Covington's Spring & Summer Color

Bring beauty to your home and garden with gorgeous fresh flowers from Covington's. We're growing a huge assortment of colorful annuals, perennials and grasses, from Alyssum to Veronica, and everything in between, to dress up your landscape throughout the spring and summer.

At Covington's we grow the top performing varieties which will provide the greatest show of seasonal color. See all of our "Covington's Grown" bedding plants so you can pick your favorites to design the garden of your dreams.

Follow these tips for the best success in growing your bedding plants:

1. Choose flowers according to the amount of sun they will receive. Use "Sun" plants if the area gets sun all afternoon or for 6 or more hours. If your area has only morning sun or is deeply shaded, use "Shade" plants. We have noted the sun or shade preference of each flower to make it easy for you to pick the right varieties for your garden.
2. Before planting your flowers, amend the soil in your flower beds to add nutrients and improve aeration. Do this by mixing compost and expanded shale (already pre-mix in our Covington's Soil Builder) in to the soil. This will break up the clay and give you a soil that is fluffy and easy to plant in.
3. Fertilize your flowers with Covington's Flower & Garden 18-6-12 slow release plant food to keep plants healthy and promote more blooms.
4. Top dress your flower beds with a 2" layer of mulch to help retain water and give your landscape a beautiful finished look.
5. Water your flowers as needed and enjoy!
